

To Whom It May Concern:

This letter confirms that Vivek Mishra was selected as a Judge for PennApps XXV, one of the world's largest and most prestigious collegiate hackathons. PennApps took place at the University of Pennsylvania School of Engineering from Friday, September 20th, 2024, to Sunday, September 22nd, 2024, with more than 500+ participants (from universities across the globe) on-site across college students, mentors, judges, and sponsor representatives.

Vivek played a crucial on Sunday morning to afternoon in helping to evaluate the more than 100 project submissions we received during the weekend. They watched project pitches from our teams, evaluated their project code and presentation based on their technical and product expertise, asked critical follow-up questions, and gave invaluable feedback to help these young minds further develop their skills. They overall played a key role in fostering an environment where students felt inspired by role models from various engineering disciplines.

PennApps received numerous applications from professionals across various industries, and Vivek's distinguished expertise in their field set them apart as an ideal candidate to evaluate the innovative projects that participants will develop. Their insights and experience were invaluable in recognizing the most impactful and forward-thinking solutions at the event.

PennApps XXV convened some of the brightest minds from universities worldwide, providing a platform for groundbreaking technological advancements and creative problem-solving. Our judges played a critical role in guiding and mentoring these young innovators, while also having the opportunity to network with other leading experts in the tech industry.
