Date: 26-Nov-2025

Dear

Mr. Vivek Kumar Mishra,

Subject: Confirmation of Inclusion of “Design Patterns for AI Agents: A Structured Approach to Building Robust and Intelligent Systems” in College Library Collection

We are happy to inform you that your book “**Design Patterns for AI Agents: A Structured Approach to Building Robust and Intelligent Systems**” (ISBN: 979-8268912371) has been added to the permanent collection of the Central Library of Anand International College of Engineering in Nov 2025 (17128)

After careful review, the Library Acquisition Committee selected the book because of its fresh and practical approach that connects advanced AI concepts (Design Patterns for AI Agents) with real-world invention and patent development, an area that was earlier not covered in this manner for engineering students and researchers.

Students and faculty have found the book particularly helpful because:

- It clearly explains how to Design Patterns for AI Agents.
- It walks through key patterns like Observer, Factory, Strategy, Broker, State Machine, Proxy, and Template Method, showing how each one helps you build smarter and more reliable agents..
- It gives a step-by-step method that students can actually follow while working on their own AI agents.

Since its arrival, the book has been regularly issued and consulted by students preparing project reports, innovation proposals, and patent drafting exercises. Many readers have shared that the book made complex AI topics easier to understand and showed them a clear path from theory to practical designing. We are confident that your book will continue to benefit our students and encourage more AI agents to design thinking on campus.

Thanking You
With Warm Regards

Anup Kr. Dubey
