RE: Mr. Vivek Kumar Mishra

To Whom It May Concern:

Mr. Mishra has accepted a conditional offer to join Randstad Digital, working full-time [40 hours per week] as an AWS Full Stack Developer at our client Vanguard Group. The anticipated start date is August 11, 2026, and he will be paid $56/hour (estimated annualized is $116,480). Work location is 200 Vanguard Blvd, Malvern, PA 19355.

Mr. Mishra's roles and responsibilities:

- Improve resiliency engineering practices across platforms and applications, including resilient application design patterns, system observability and deployment strategies.
- Incident detection, troubleshooting, and resolution. Develop automation for incident response and infrastructure management.
- Develop and support OpenTelemetry integrations for multiple application platforms (browser, ECS, lambda, etc.) and languages (JavaScript, Java, Python and AWS).
- Contribute to architectural decisions and support implementation of solutions. Collaborates with cross-functional teams, supports production, resolves complex issues, works independently on ad hoc business requests, and mentors junior staff.

Randstad Digital (26-3305132) participates in the E-Verify program, and our DHS company code is 2951880.

If you have any further questions regarding Mr. Mishra's anticipated employment, please feel free to contact me at rd-fieldopertations@randstaddigital.com.

Kind regards,

Julie Kundrach
Sr. Field Operations Specialist
