Dear Distinguished Colleague,

We kindly invite you to review a manuscript submitted to the 4th International Conference on Artificial Intelligence, Computer, Data Sciences and Applications (ACDSA 2027), to be held in Rio de Janeiro, Brazil, on 2–4 February 2027.

We highly value your academic expertise and experience. Please note that some reviewers may have been assigned multiple manuscripts in recognition of their extensive expertise, proven reviewing experience, and ability to provide insightful and constructive evaluations.
We sincerely appreciate your valuable contribution to maintaining the scientific quality of our conference.

We would be delighted if you could accept our invitation and submit your comments at your earliest convenience. Please evaluate the manuscript's originality, methodology, results, clarity, and technical quality, providing at least 20 words of feedback.

Please sent your comments no later than 27 October 2026.

Thank you for your cooperation, support and kind help.

Title:
1503: Governance of Adaptive Intelligence: A Comprehensive SWOT Assessment of Healthcare AI Frameworks
Abstract:
Worldwide healthcare has now entered the era of Artificial Intelligence (AI), which is a system that evolves with time and is continuously learning. Unlike conventional software, AI is not controlled by a single set of algorithms. New data inputs and self-learning make it an entirely different system. With this unique capability to. Self-evolve, AI also puts new challenges to mankind to make new regulatory mechanisms. These mechanisms should be so comprehensive that they cover every aspect of AI and defend the patient rights. Quality of service, patient safety, consent, medical ethics, and cybersecurity these are some of the points need to be covered.

In this narrative review, we have explored the existing frameworks adopted by EU, WHO, US, UK, Canada and Asia pacific region. We have analyzed these frameworks with the help of existing peer review research available in the PubMed/MEDLINE, Scopus, Web of Science, and Google Scholar. A SWOT analysis tool was used to explore and present the findings of the analysis.
